Hi All,

Thank you for sharing. I'll set up a meeting to discuss. Please let me know if you have any questions.  
Thank you,  
Matt

> Attached is a request EPA received on 12/16/16, from Exide for an applicability determination. Exide closed their lead smelting operation in 2014. As part of the closure plan, Exide informed SCAQMD that they wanted to heat up their refining kettles to remove residual lead-containing materials for disposal. SCAQMD informed the company that they would need to use air emission controls for this process. Mr. Andrew Lee of SCAQMD discussed the issue with me during a quarterly meeting in September 2016. I stated that I needed to see a written plan before making an applicability determination (see attached EPA email dated 9/6/16). The written request is attached.
